

Taylor & Francis is pleased to announce that physicist Dr Matthias Gehre is taking over from Dr Gerhard Strauch as the Editor-in-Chief of Isotopes in Environmental & Health Studies. Throughout his scientific career, Matthias Gehre has been involved with stable isotopes, especially with their analysis. Since 1992 he has been head of the Laboratory for Stable Isotope Analysis (LSI) at the Helmholtz Centre for Environmental Research – UFZ, Germany. Together with his team, he developed several methods for measuring stable isotopes of light elements (HCNOS+Cl). In cooperation with e.g. the IAEA, USGS and NIST, he is involved in the development of new reference materials for stable isotopes.
