Cognitive Neuroscience: For Reviewers

To submit your review please log on to our [ScholarOne Manuscripts online submission site](#).

For Short Reports, we pride ourselves on having streamlined reviewing. As such, we do not require a lengthy review from you. In most cases, one or two paragraphs will suffice. Your review should consider the main strengths and weaknesses of the article and provide constructive comments for the authors. Submissions requiring major revision will be rejected.

For Discussion Papers, please comment on the suitability of the article for published peer commentary in addition to providing your evaluation of the manuscript.
