

Contemporary NURSE

SPECIAL ISSUE CALL FOR PAPERS:

**DIGITAL HEALTH:
ENHANCING QUALITY & SAFETY OF
PATIENT CARE**

This call for papers is for a special themed issue of Contemporary Nurse Journal which will address all areas of research, theory, and policy dedicated to **the role of digital health in improving the quality and safety of patient care.**

Digital health encompasses the use of digital technologies to improve health outcomes, healthcare delivery, and quality of life. With the rapid advancement of technologies such as electronic health/medical records (EHR/EMRs), telemedicine, mobile health apps, wearable devices, and artificial intelligence, digital health has become an integral component of modern healthcare systems. This special issue of Contemporary Nurse aims to explore the intersection of digital health and the quality and safety of patient care, providing nurses worldwide with insights into how these technologies can be leveraged to enhance clinical practice, patient outcomes, and overall healthcare delivery.

Topics may include but are not limited to:

- Digital health and its implications for nursing practice.
- Impact of EMR/EHRs on patient care quality and safety.
- Evidence-based insights and case studies demonstrating the successful integration of digital health tools in various healthcare settings.
- Enhancing patient access and care continuity through digital technologies such as telehealth.
- Challenges and opportunities associated with the adoption of digital health technologies.
- Evaluation of telehealth outcomes in nursing practice.
- Wearable devices and remote monitoring impact on early detection and prevention of adverse events.
- Artificial intelligence and machine learning in enhancing nursing care quality.
- Social media and technology assisted patient education and support (including apps).
- Role of nurses in ensuring patient safety in a digital health environment.

We welcome submission of papers with on-line/pre-print publication from **time of acceptance of final proofs.**

About Contemporary Nurse

Contemporary Nurse is an international, peer-reviewed, scientific journal of interest to practitioners, clinical academics, educators and scholars in the discipline of nursing. The journal aims to intensify discipline advancement, professional development and standards for practice by publishing stimulating, informative articles on issues directly relevant to contemporary clinical nursing practice.

Contemporary Nurse publishes original research articles, reviews aligned to a specific methodology, discussion papers and 'Future Leaders' submissions.

Submission Instructions

You should submit your article for review via this link:
<https://accounts.taylorfrancis.com/identity/#/login>

If you have questions about the submission process please contact RCNJ-peerreview@journals.tandf.co.uk

Instructions for Authors are available via
<https://www.tandfonline.com/action/authorSubmission?show=instructions&journalCode=rcnj20>

When you submit your article you will be asked whether you are submitting for a Special Issue. Please use the drop-down menu to note that you are submitting your paper for the Special Issue: Digital Health. Please also note Special Issue in your cover letter and the title page of your manuscript.
