

References or citations should be indicated ALPHABETICALLY within the text (e.g. Jones 2000; Smith and Jones 1999), separated with semi-colon, no comma before year.

Precise page references should be given for quotations. For example: Daalder (1990: 63–4), Page and Wright (1992: 27–30; 1995: 56–87). Use '*et al.*' (in italic) when citing a work by more than two authors, but then use all authors' names (up to 7) in the listing of cited works at the end of the paper (where there are more than 7 authors, please use *et al.* only). The letters a, b, c, etc., should be used to distinguish citations of different works by the same author in the same year, e.g. Wright (1995a: 15–20; 1995b). All references cited in the text should be listed alphabetically and presented in full after the notes, using the following style.

ARTICLES IN JOURNALS:

D'Alimonte, Roberto, and Stefano Bartolini (1998). 'How to Lose a Majority: The Competition in Single-Member Districts', *European Journal of Political Research*, 34:1, 163–64.
