

Physiotherapy Theory and Practice

Citing in the Manuscript

References should be cited parenthetically in the text by author surname(s) and year (see examples below).

1 author	(Smith, 2010)
2 authors	(Smith and Jones, 2010)
3 authors	(Smith, Jones, and Adams, 2010)
4 authors	(Smith, Jones, Adams, and Branch, 2010)
5 or more authors	(Smith et al, 2010)

For more than one citation these should be listed alphabetically within the parentheses (see an example below).

(Adams, 2010; Branch and Jones; 2008; Smith et al, 2012)

If authors are cited beginning a sentence the following formats should be followed:

1 author	Smith (2010) reported...
2 authors	Smith and Jones (2010) reported...
3 authors	Smith, Jones, and Adams (2010) reported...
4 authors	Smith, Jones, Adams, and Branch (2010) reported...
5 or more authors	Smith et al. (2010) reported...

References Section

References should be listed in a separate section at the end of the main text. All references in the list should be ordered alphabetically by the first author's surname (last name). If more than 10 individuals authored a resource, the reference entry documenting the resource should list the first 10 authors followed by "et al." (e.g., Smith A, Jones B, Smythe c, Jonesy D, Smitty E, Jonesi F, Smithe G, Janes H, Smithee I, Junes J, et al.). Journal titles need to be in full (no abbreviations). Examples of common reference types appear below. Do not include doi number unless the article does not have page numbers from the journal as when [In Press]. In addition, do not include issues numbers; include *only* volume numbers unless a journal is not paginated continuously throughout the volume (see examples below).

Journal article

Taylor J, Ogilvie BC 1994 A conceptual model of adaptation to retirement among athletes: A meta-analysis. *Journal of Applied Sport Psychology* 6: 7–20.

Issued 2018
